

9th Applied Clinical Nephrology Course

11th and 12th July 2026

Health Academy, Royal Preston Hospital
Lancashire Teaching Hospitals NHS Foundation Trust

Introduction

The aim of this course is to provide an interactive, comprehensive, and up-to-date approach to the management of real and challenging clinical cases in nephrology, dialysis, and transplantation. This is a practical, interactive course rather than a purely theoretical one, with applied cases forming the core of the teaching. These enable fruitful discussions and debates, facilitated through the use of the Vevox app to create a stress-free, engaging learning environment.

The course provides an excellent opportunity to meet leading UK experts in nephrology.

It will cover topics that nephrologists and trainees encounter on a day-to-day basis and that are essential for consultant practice, as well as for trainees preparing for the specialty exit examination in nephrology, the European Specialty Examination in Nephrology (ESENeph). The programme also includes more complex and nuanced areas, such as ethical aspects of kidney transplantation and living donation, as well as dialysis, acute kidney injury (AKI), chronic kidney disease (CKD), glomerulonephritis, and virtual ward rounds.

The course is aimed at renal trainees, renal specialists, and consultant nephrologists.

Organiser

Dr Aimun Ahmed, Consultant Nephrologist, Royal Preston
Hospital, Lancashire Teaching Hospitals NHS Foundation Trust
