## National Registry of Rare Kidney Diseases (RaDaR)

### Consultee Invitation Letter

Dear Consultee,

Please find information enclosed about the National Registry of Rare Kidney Diseases (RaDaR).

RaDaR is a research registry that your relative/friend's hospital kidney unit is participating in. The aim of RaDaR is to collect information we can use to help us understand more about kidney diseases and improve treatments. RaDaR currently holds information on more than 34,000 people and is the largest collection of rare kidney disease data in the world.

Please take the time to read the information. If you decide your relative/friend would have no objection to taking part, please complete the enclosed declaration form. Please return the form to their kidney unit at the address at the top of this letter.

It is important to know that participation in RaDaR is entirely voluntary and if you decide your relative/friend would not want to take part it will not affect their treatment or medical care in any way.

If you have any questions or would like to discuss RaDaR further, please contact their kidney doctor or kidney nurse, or contact the RaDaR Operations Manager using the following email address: [radar@ukkidney.org](mailto:radar@ukkidney.org).

Thank you for your time.

Encs.
